

# Sustainability at Going Nepal Travel Agency

At Going Nepal Travel Agency, we are committed to promoting responsible and sustainable tourism that benefits both the environment and local communities. Over the past two years, we have actively implemented practices to reduce our environmental impact and support community development.

## Our Key Actions

We have taken several practical steps to improve sustainability across our operations:

- Introduced the use of bamboo bottles to reduce single-use plastic
- Maintained plants in our office to create a greener and healthier workspace
- Started using an electric vehicle (EV) for transportation to reduce carbon emissions
- Reduced paper usage by shifting to digital itineraries and communication
- Promoted eco-friendly accommodation options in our travel packages
- Donated to DOCS Foundation Nepal to support community initiatives
- Collaborated with international platforms such as Viaje Comigo, where our sustainability efforts have been featured

## Our Results

As a result of these initiatives:

- Paper usage has been reduced by approximately **25%**
- Eco-friendly accommodation options have increased by around **30%**
- Around **50% of our partners** follow basic sustainability practices
- Improved customer awareness and positive feedback on responsible tourism

Our sustainability efforts have also been recognized internationally and featured on the Portuguese platform Viaje Comigo.

## Our Commitment Going Forward

We remain dedicated to continuously improving our sustainability performance. Our future focus includes expanding partnerships with responsible suppliers, enhancing monitoring systems, and increasing awareness among staff and travelers.

## ∞ External Recognition
